

DRAGONUS II RTF

Programmable Precise Rotor head System

Features.

- 100% prebuilt ready to fly
- Super strong and light weight frames
- Super part has undergone strenuous 3D simulation pressure testing and extensive real life testing
- Each part has undergone one piece landing slide and Advanced pilot settings
- Extremely durable Rotor head (Beginner, Intermediate and CNC machining parts contribute to extremely stable flying operation)
- Programmable Rotor head (Beginner, Intermediate and Advanced pilot settings)
- 120 deg CCPM operation, precise molding and CNC machining parts contribute to extremely stable flying operation

- Main rotor grips contain two radial bearing
- Tail rotor hub system
- Drives tail rotor system
- Precise tail pitch control system
- Tough Main gear
- 33 Ball bearings More than any other 450 class helicopter

MADE IN TAIWAN

La gamme " Dragonus II" est également disponible en version 100% montée, avec moteur Pro-Tronik 440DH et variateur Pro-Tronik PM 30A (Bec 3 ampères) inclus. Le moteur est déjà installé, il ne reste plus qu'à installer l'électronique et découper / décorer la bulle !

The Dragonus range is also available 100% built with motor installed (440DH or 460 DH) and PM 30A Esc. Just install your electronics, prepare the canopy and you are ready to fly

100% MONTE / Ready to Fly
